## PROJECTS

---

### LookieLoo

A web app that allows the user to see all public toilets around them, review public toilets, as well as add toilets that are not currently in our database. Built using Ruby on Rails for the backend, React for the web app frontend, and React Native for the mobile app.

### Next Best Friend

[http://fjunior225.github.io/next\\_best\\_friend.html](http://fjunior225.github.io/next_best_friend.html)

Mobile application that allows a user to look through adoptable pets that are currently living in shelters based on their location. A user can swipe through different types of animals and favorite those of interest. Built using Ruby on Rails for the backend, React Native for the frontend.

### self.Diary

Mobile app platform that will allow users to jot down dreams, thoughts, emotions & behavior. It will use Cognitive Behavior Theory worksheets to collect a user's reaction to a specific situation and help to counteract that reaction, if negative. A user can then use this app when reaching out to a therapist or counselor.
